uStream Groove System

Complete wireless vinyl system

A complete vinyl system in one box. No amplifier, no receiver, no cables.

The uStream Groove System is the uStream TT1 turntable and a pair of uStream Cube speakers in one box. The turntable streams to the speakers the moment it powers on, the speakers pair to each other, and there is no wire between any of them. Unbox it, place the speakers where you want them, and put a record on. When the turntable is idle the speakers take any other Bluetooth source, and HDMI ARC connects them to the television.
