uStream TT1

Wireless Bluetooth turntable

Your records. Anywhere in the room.

The uStream TT1 streams a record straight to any Bluetooth speaker, including every uStream speaker, without a phono stage, a receiver or a cable between the deck and what it plays through. It is a manual turntable: you lift the tonearm onto the record to start and lift it back onto its rest when the side ends, and the platter stops itself at the end of a side. A belt drive that checks and corrects its own speed, an aluminium alloy platter and tonearm, an Audio-Technica AT-3600 moving magnet cartridge and a switchable built-in RIAA phono stage for anyone who prefers wires.

33⅓ / 45	Manual	AT-3600	BT 5.1
RPM, BELT DRIVE	TONEARM, BY HAND	MOVING MAGNET CARTRIDGE	TRANSMITS TO SPEAKERS
